

## **SEALANTS**

Preventative sealants have been placed on your child's teeth in order to prevent cavities on the chewing surface of the back teeth. There is no eating or drinking restrictions after sealant application.

- Sealant may feel different when biting down, but this will gradually wear away.
- Avoid chewing on things like ice, pen caps, hard candy, etc. to prevent the sealants from chipping and breaking.

Sealants can remain in place for many years if they receive proper care.
